Solution Manual
This article communicates a new problem and solution: Fluid is initially motionless in a rectangular space the shape of which is free to vary. A blade enters along one of the sides of the rectangle, moves at constant speed, and sets the fluid in motion by viscous diffusion. If the constructal law of design evolution is

Read Online Design With Constructal Theory

invoked, then the evolutionary direction is toward the shape of the rectangular space such that the entire fluid is set in laminar flow more easily, during the shortest time.
