The 2019 Global Health Index revealed that well before COVID-19, most countries in South Asia and Sub-Saharan Africa exhibited “serious levels” of hunger. Up to 40 percent of young children in South Asia and approximately 30 percent in Sub-Saharan Africa are stunted. The consequences go far beyond height.

In *Unprepared*, Andrew Lakoff follows the history of health preparedness from its beginnings in 1950s Cold War civil defense to the early twenty-first century, when international health authorities carved out a global space for governing potential outbreaks. Alert systems and trigger devices now link health authorities, government officials, and vaccine manufacturers, all of whom are concerned with the possibility of a global pandemic.

Global Health in Times of Violence 1. For those—the countless many—who live in regions of the world riddled with conflict, insecurity, oppression, and (all too often) great poverty, these truly must seem like dark times. Even for those of us privileged (and lucky) to live in areas of relative peace and prosperity, violence seems to be ever present—if not in our daily lives, then certainly in the lives of others, captured by the daily news.

Global health supply chains face unprecedented stresses in time of unprecedented need. A smooth-running global health supply chain is always essential, yet a once-in-a-century pandemic has challenged it like no other time. Understanding those challenges and exploring ways to boost resilience are among the key topics of this year's Global Health Supply Chain Summit, a three-day event that kicks off Tuesday, Nov. 17.

China's engagement in global affairs has changed substantially in the 2010s. One aspect of the country's global reorientation has been its increased interest in, and willingness to play a role in, global health. In the early 2010s, the UK Department for International Development (DFID) initiated a collaboration with the Chinese government on a programme to support the country to play a ...
