Harvard Design School Guide to Shopping—ResearchGate

Harvard Design School's Project on the City is a graduate thesis program that examines the effects of modernization on the urban condition. Each year the Project on the City studies a specific region or phenomenon, and develops a conceptual framework and vocabulary for urban environments that cannot be described within the traditional categories of architecture, landscape, or urbanism.

Harvard Design School Guide to Shopping | Designers & Books

Harvard GSD (Graduate School of Design) students would tell you that the whole book is a somewhat cynical exercise for Mr. Koolhaas to use his academic assistants to produce "research" that attempted to justify intellectually what he was designing for the Prada stores in NY, LA, etc. (a "cash cow" for Koolhaas' architectural firm according to his chief assistant) But since Koolhaas is an established and bankable star, none of the participants are complaining.

Project on the City II: The Harvard Guide to Shopping Shopping is arguably the last remaining form of public activity. The Harvard Guide to Shopping , made by the Harvard Graduate School of Design and OMA, explores the spaces, people, techniques, ideologies, and inventions by which shopping has so dramatically refashioned the city at the turn of the century.

Project on the City II: The Harvard Guide to Shopping

On October 23, the Harvard Graduate School of Design (GSD) announced a restructuring of its master of design studies (M.Des.) program—a curriculum shift intended in part, wrote its dean, Sarah Whiting, in a letter to the community, to bolster the focus on issues like social justice, climate, and housing.

The Harvard Graduate School of Design Restructures Its ...

Thus, despite its lighthearted title, the Harvard Design School Guide to Shopping (Taschen, 2002) is no merry primer on the world's chic boutiques. Rather, this unusual 800-page book examines all things retail from the architecture of Niketown, Disneyworld, and airport malls to the histories of escalators, air-conditioning, and bar codes and, through essays, interviews, pages of photographs, and statistics, identifies shopping as a defining and unsightly feature of urban society.

| Harvard Magazine

Harvard Design School Guide to Shopping is a compendium of 45 essays by 15 participants with the usual killer images and stats (for example, yearly sales at Wal-Mart exceed the GNP of three-quarters of countries in the world; the total area devoted to retail in the world, a third of it in the US, is equal to 33 Manhattans). At once technological and economic, social and cultural, the analysis tracks post-industrial consumption as it transforms the city almost as much as industrial production ...

SHOPPING is arguably the last remaining form of public activity. Through a battery of increasingly predatory forms, shopping has infiltrated, colonized, and even replaced, almost every aspect of urban life. Town centers, suburbs, streets, and now airports, train stations, museums, hospitals, schools, the internet, and the military are shaped by the mechanisms and spaces of shopping. The voracity by which shopping pursues the public has, in effect, made it one of the principal-if only-modes by which we experience the city. The Harvard Design School Guide to Shopping explores the spaces, people, techniques, ideologies, and inventions by which shopping has so dramatically refashioned the city. Perhaps the beginning of the twenty-first century will be remembered as the point where the urban could no longer be understood without shopping. The PROJECT ON THE CITY, formerly known as "The Project for What Used to be the City," is an ongoing research effort that examines the effects of modernization on the urban condition. Each year the Project on the City investigates a specific urban region or a general urban condition undergoing virulent change. It tries to capture and decipher ongoing mutations in order to develop a new conceptual framework and vocabulary for phenomena that can no longer be described within the traditional categories of architecture, landscape, and urban planning. The first project, Great Leap Forward, focuses on the new forms and speeds of urbanization in the Pearl River Delta, China. The second project investigates the impact of shopping on the city. The third project explores the urban condition of Lagos, Nigeria. The fourth project treats the invention and expansion of the "systematic" Roman city as an early version of modernization and a prototype for the current process of globalization.

Harvard Design School's Project on the City is a graduate thesis program that examines the effects of modernization on the urban condition. Each year the Project on the City studies a specific region or phenomena, & develops a conceptual framework & vocabulary for urban environments that can not be described within the traditional categories of architecture, landscape, or urbanism. In order to understand new forms of urbanization, thesis advisor Rem Koolhaas & students from the fields of architecture, landscape, & urbanism, document & analyze areas of study through a combination of field research, statistical analysis, historical developments, & anecdotal situations. The result of each project is an intensive, specialized study of the effects of modernization on the contemporary city. During the 1996-1997 period, Harvard's graduate students studied China's Pearl River Delta (PRD), a cluster of five cities with a population of twelve million destined to reach thirty-six million by the year 2020. The establishment in the PRD of Special Economic Zones--"laboratories for the contained unleashing of capitalism"--hastened an unprecedented experiment in urbanization on an astonishingly large scale. Great Leap Forward contains essays which explore, in a theoretical & statistical context, the results of this rapid modernization that has produced an entirely new urban substance.

Gender equality is a moral and a business imperative. But unconscious bias holds us back and de-biasing minds has proven to be difficult and expensive. Behavioral design offers a new solution. Iris Bohnet shows that by de-biasing organizations instead of individuals, we can make smart changes that have big impacts—often at low cost and high speed.

Conventional medical science on the Chinese art of Tai Chi now shows what Tai Chi masters have known for centuries: regular practice leads to more vigor and flexibility, better balance and mobility, and a sense of well-being. Cutting-edge research from Harvard Medical School also supports the long-standing claims that Tai Chi also has a beneficial impact on the health of the heart, bones, nerves and muscles, immune system, and the mind. This research provides fascinating insight into the underlying physiological mechanisms that explain how Tai Chi actually works. Dr. Peter M. Wayne, a longtime Tai Chi teacher and a researcher at Harvard Medical School, developed and tested protocols similar to the simplified program he includes in this book, which is suited to people of all ages, and can be done in just a few minutes a day. This book includes: • The basic program, illustrated by more than 50 photographs • Practical tips for integrating Tai Chi into everyday activities • An introduction to the traditional principles of Tai Chi • Up-to-date summaries of the research literature on the health benefits of Tai Chi • How Tai Chi can enhance work productivity, creativity, and sports performance • And much more

Platform 10: Live Feed confronts a central paradox: the "live feeds" of our lives are exponentially more mediated than the analog forms of documentation they are so quickly replacing and erasing. This fact, in combination with the rapid manipulability endemic to all electronic media, now presents us, its users, with radically new conditions of knowledge and imagination. Under these conditions, real-time platforms for meaningful self-expression and fictionalization are inextricably tied to the novel consequences--political, ethical, epistemological--of a world in which distortion, simulation, and manipulation are often indistinguishable from their opposite. Platform 10: Live Feed is a document of images presented in reverse chronological order from July 2017 to August 2016. Pulled from a crowd-sourced database of 117,518 available files, this "live feed" of the institution samples images from students, faculty, and staff alike, revealing the fluidity between the place, production, and people of the Harvard University Graduate School of Design. With Contributions of Mohsen Mostafavi, Dean and Alexander and Victoria Wiley Professor of Design at the Harvard University Graduate School of Design.

In this national bestseller based on Harvard Medical School and Harvard School of Public Health research, Dr. Willett explains why the USDA guidelines--the famous food pyramid--are not only wrong but also dangerous.

A healthy building does more than conserve resources: it improves the health and productivity of the people inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.

Promote positive change and elevate teacher practice with this actionable framework for school-based innovation Inquiry-Driven Innovation: A Practical Guide to Supporting School-Based Change addresses a pressing need for intentional and sustained innovation in education. It is both a practical guide for supporting school-based change and a handbook for effective professional development that empowers and re-energizes practitioners. Throughout this book, educators will find a wealth of examples from different school contexts and a rich array of research-based pedagogical tools and resources. In recent years, educational innovation and school redesign have been the focus for many school boards and departments of education. However, current school-based innovation methods typically lack flexibility and intentionality. Inquiry-Driven Innovation offers an approach to innovation that recognizes local contexts, promotes listening across stakeholder groups, and suggests structures for ongoing and purpose-driven work. Discover an actionable framework for school-based innovation Learn from real-world case studies of educators developing innovation strategies in a variety of school contexts Explore an Innovation Toolkit filled with research-based pedagogical tools and resources for educators In this book, you'll learn the five essential qualities of Inquiry-Driven Innovation: an ongoing process that empowers individuals and communities to pursue positive change that is both relevant and responsive to their contexts. Inquiry-Driven Innovation is purposeful and intentional; attentive to multiple perspectives; adapted to context; sustained and iterative; and structured and supported. Read this book to learn how you can implement evidence-based innovation strategies in your own community.

A practical guide to male health issues, presented in an accessible format, provides coverage of specific conditions and outlines a four-part program for health maintenance that involves diet, exercise, supplements, and behavior modification. Reprint. 20,000 first printing.

Put your sleep problems to rest with this proven six-step plan How many times have you heard it's important to get a good night's sleep? It sounds simple, but it isn't always easy. Now one of the nation's leading sleep experts gives you a step-by-step program for overcoming sleep problems from insomnia and snoring to restless legs syndrome and sleep apnea. Dr. Lawrence Epstein of Harvard Medical School reveals his proven six-step plan to maximize your nights and energize your days. He explains the health benefits of sleep and identifies signs of sleep problems as he gives in-depth advice on how to: Turn your bedroom into the optimal sleep environment Finally overcome insomnia Silence buzz-saw snoring Relax restless legs Deal with daytime exhaustion Determine if sleep medication is right for you Improve your sleep by improving your child's sleep
