This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

This book introduces corporate financial management, based on the basic capital budgeting framework and the time value of money. It focuses on theoretical formulations and correct application of financial techniques that will help improve managerial and financial decisions. Based on fundamental principles of accounting and finance like time value of money and after-tax, it introduces readers to real-world constraints and complexities in the two fields. Written in a simple and accessible manner. It can be read by students of finance and accounting courses, business professionals and general public alike.

Contains, for each text chapter: pretest, chapter overview, detailed chapter review - including study tips, practice test questions and demonstration problems with worked-out solutions.

This text offers an accessible introduction to accounting, ensuring that the student's initial study of the subject is interesting and enjoyable. The text takes an applied and interactive approach with many case studies, self-study questions, exam papers and activities to help reinforce student learning by practice.

Accounting and Finance: An Introduction, now in its ninth edition, contains all the information you need to start your business career. With its use of practical techniques and real-world examples, this best-selling text teaches you the basics of understanding and using financial information.

This finance and accounting book is set apart from others in that it discusses all the basic aspects of finance and accounting in one single textbook, including the discussion of: Financial Management, Management Accounting, and Financial Accounting. Typically, these three subjects are treated separately as individual topics. They are closely related, however, since they all deal with the many financial issues facing business organizations. All topics are discussed at an introductory level, which makes this book very useful for introductory courses on finance and accounting. The book will be of interest to students preparing for a more in-depth study of the topics later in their curriculum, as well as for those who need a basic, yet comprehensive, introduction to the subject. The book's intended audience is students following bachelor programs of business science, however it may also be suitable for master program students, especially for those students whose focus is more on practical relevance than on academic theory.
