It had been years since I had seen any of the children with whom I had grown up. When I left the children's home, I promised myself that I would have nothing to do with them, I was sure that my only chance of living a good life would be to put the past behind me, even though that meant saying goodbye to some of the people I loved the most - as well as the ones I hated...it turned out that six of us had died, several by slow suicide in the form of heroin abuse, and at least two by faster means. When two police officers arrived out of the blue at Paul Connolly's door, he learned the shocking news that, out of the eight children with whom he shared a dormitory in care, only two were still alive. The revelation unearthed painful memories of a childhood that, until this point, Paul had tried desperately to put behind him. Abandoned at two weeks old, Paul came of age in the infamous St Leonards's Children's Home in East London. The children there were routinely abused, often over the course of many years. All were underfed and unloved and told that they would amount to nothing. Angry and frustrated, Paul channelled his rage into boxing - but when an accident shattered his ambition to turn professional, he found his true calling and became a successful trainer, even working as a consultant on the pilot of a top model's fitness video. Paul has finally found peace and fulfilment beyond anything he could have imagined all those years ago. He has found happiness with his wife and children and now helps to heal broken bodies, build confidence and transform lives - but he will never forget his past and the unnecessary victims of broken society...

See the sights of New York as never before! Award-winning illustrator Paul Thurlby takes the reader from A for The American Museum of Natural History to Z for The Bronx Zoo. Paired with snippets of information about each landmark, each page's bold, eye-catching imagery is a visual treat for both kids and adults. As a fun bonus, a little gorilla hidden on each page adds an interactive element that kids will love.

Cities, initially a product of the manufacturing era, have been thoroughly remade in the image of consumer society. Competitive spending among affluent households has intensified the importance of style and design at every scale and design professions have grown in size and importance, reflecting distinctive geographies and locating disproportionately in cities most intimately connected with global systems of key business services. Meanwhile, many observers still believe good design can make positive contributions to people's lives. Cities and Design explores the complex relationships between design and urban environments. It traces the intellectual roots of urban design, presents a critical appraisal of the imprint and effectiveness of design professions in shaping urban environments, examines the role of design in the material culture of contemporary cities, and explores the complex linkages among designers, producers and distributors in contemporary cities, for example: fashion and graphic design in New York; architecture, fashion and publishing in London; furniture, industrial design, interior design and fashion in Milan; haute couture in Paris and so on. This book offers a distinctive social science perspective on the economic and cultural context of design in contemporary cities, presenting cities themselves as settings for design, design services and the 'affect' associated with design.

London, a fascinating metropolis not just in terms of its history and landmark buildings, is also a city that grew out of villages. Its unique geography is expressed in a mosaic of districts, each with its own distinctive character and pedigree. London's districts, with their patchwork layout of primarily Georgian and Victorian squares and terraces juxtaposed with modern buildings and estates, reflect changing ideals in architecture, urban design and planning as well as shifting values in real estate and the insatiable thirst of its consumers. London is thus both text and context: fossilized social history, layerings of economic, social, and architectural history conveyed in stock brick, stucco, Portland stone, glass and steel. Underpinning this urban landscape is an evolutionary resilience that has maintained the basic spatial framework of the metropolis and sustained its imitable character. The city's institutional framework has been severely ruptured and reinvented time and time again after fires, bombs, floods or wholesale redevelopment. Political unrest and racial conflict have resulted in riots, while successive rounds of investment and disinvestment have replaced elements of the built environment many times over. This book offers an insightful perspective into the distinctiveness of London as expressed through its socially significant buildings and districts.

A work of unparalleled candor and splendorous beauty, The Lyrics celebrates the creative life and the musical genius of Paul McCartney through 154 of his most meaningful songs. From his early Liverpool days, through the historic decade of The Beatles, to Wings and his long solo career, The Lyrics pairs the definitive texts of 154 Paul McCartney songs with first-person commentaries on his life and music. Spanning two alphabetically arranged volumes, these commentaries reveal how the songs came to be and the people who inspired them: his devoted parents, Mary and Jim; his songwriting partner, John Lennon; his "Golden Earth Girl," Linda Eastman; his wife, Nancy McCartney; and even Queen Elizabeth, among many others. Here are the origins of "Let It Be," "Lovely Rita," "Yesterday," and "Mull of Kintyre," as well as McCartney's literary influences, including Shakespeare, Lewis Carroll, and Alan Durband, his high-school English teacher. With images from McCartney's personal archives—handwritten texts, paintings, and photographs, hundreds previously unseen—The Lyrics, spanning sixty-four years, becomes the definitive literary and visual record of one of the greatest songwriters of all time.

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? **NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY** The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naive medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

How should we make choices when we know so little about our futures? L.A. Paul argues that we must view life decisions as choices to make discoveries about the nature of experience. Her account of transformative experience holds that part of the value of living authentically is to experience our lives and preferences in whatever ways they evolve.
