Maximising the potential of evidence-based nursing. Evidence-based care concerns the incorporation of evidence from research, clinical expertise, and patient preferences into decisions about the health care of individual patients. 14 Most professionals seek to ensure that their care is effective, compassionate, and meets the needs of their patients. Therefore sound research evidence which tells us what does and does not work, and with whom and where it works best, is good news.

Nursing, research, and the evidence | Evidence-Based Nursing

Nursing research and evidence underpinning policy dialogue and system transformation. Central to the nursing profession leading transformational change is the use of evidence-based practice. Nursing practice is responding to ongoing and rapidly changing patient and staff need and underpinning these changes with research and evidence in policy making is crucial.

NHS England » Nursing research and evidence underpinning ...

Although the purposes of nursing research (conducting research to generate new knowledge) and evidence-based nursing practice (utilizing best evidence as basis of nursing practice) seem quite different, an increasing number of research studies have been conducted with the goal of translating evidence effectively into practice. Clearly, evidence from research (effective innovation) must be accompanied by effective implementation, and an enabling context to achieve significant outcomes.
