Rafting definition is - present participle of raft:2 How to use rafting in a sentence.

"Rafting Rise is a terrific book, the richly detailed evocation of an entire world, and an important contribution to the literature of the rural South."--Ted Kooser "Rafting Rise has the strength of extended narrative and the quickness of lyric poetry. There is a haunting, visionary quality to Joe Survant's dramatic poem, bringing to life a world of log rafting and floodplain dwellers along the Rough and Green Rivers in 1916 and 1917. The sections are snapshots and ballads of witness, a counterpoint of voices that open a window on this long-ago time and place, of giant catfish and spells, logjams and river witch. The phrases shine and the lines sing out, and the dead come back and speak again, as the real enters the realm of legend."--Robert Morgan "Joe Survant writes about turn-of-the-century backwoods America with an uncanny sense of firsthand knowledge. He knows whereof he writes, and he writes with an authority that derives from a deep-seated respect for the lives of river folk and trappers and the lone inhabitants of 'womenless shacks.' And for all the harsh realities of a life hacked out of such rough terrain, Mr. Survant never overlooks the beauty of 'sycamores grazing by the creek,' wild grapes growing in the river bottoms, or a thicket lit by trumpet weed. To read this book is to enter a world, and to follow its narrative is to be carried on the current of a deeply compelling adventure."--Sherod Santos Set in the central Kentucky basins of the Rough, Green, and Ohio Rivers in 1916-17, Rafting Rise joins the storytelling virtues of fiction with the intensity of the poetic lyric to reach a wider audience, including readers of poetry, lovers of good tales, and those interested in the small events of history recreated through the lives of carefully imagined characters. The book's central action is the rafting of logs in winter down the rivers to the lumber mills in Evansville, Indiana. Survant recreates the whole fabric of the hardscrabble society that lives by this perilous trade. They are tough people, such as Carl Peters, stranded on a raft run aground in a freezing rain, walking in a figure eight all night to stay alive while his fellow rafter Tom Simpson, who didn't make it, ". . . lay/like frozen wood/in the bottom of our boat." Elsewhere, in love poems and poems celebrating the lush riverine landscape, Survant conveys the simple, sensuous moments that punctuate this hard life. Here is Bill Balcom at a camp meeting, eighteen and chafing for adventure on the river: "When I took/a piece of Susie's buttermilk pie,/I saw her looking,/and when I ate/I imagined/ her taste." But none of the characters is more vivid than Sallie, the female protagonist, a half-mad medicine woman living with her dogs in whatever shelter she can find. Survant gives Sallie such a deep empathy with the countryside and its creatures

that she becomes the spirit of the place. But Sallie pays dearly for her empathy with nature, hearing voices over which she has no power. Worse, she has the curse of prophecy, can see the hand of death before it strikes, and is as much feared as needed by the community. Through these and a handful of other characters, Servant fashions a verse epic of Kentucky on the eve of the entry of the United States into World War I. This volume continues the experiment begun in his earlier *Anne & Alpheus*, combining poetry and narrative to tell the story of several generations connected by place and memory across the artificial boundaries of time. Joe Servant is professor of English at Western Kentucky University and author of *The Presence of Snow in the Tropics*; *Anne & Alpheus, 1842-1882*, winner of the Arkansas Poetry Award.

From the Yenisey 's headwaters in the wild heart of central Asia to its mouth on the Arctic Ocean, Colin Angus and his fellow adventurers travel 5,500 kilometres of one of the world 's most dangerous rivers through remotest Mongolia and Siberia, and live to tell about it. Exploration is Colin Angus ' calling. It is not only the tug of excitement and challenge that keeps sending him on death-defying journeys down some of the world 's most powerful waterways, it is a desire to know a place more intimately than you could from the window of a train, to feel the soul of a place. Angus emphasizes that rivers have always been key to the development of complex societies and the rise of civilizations, offering as they do irrigation, transportation, hydroelectric power, and food. But, as *Lost in Mongolia* captures with breathtaking detail, while they giveth plenty, the great rivers also taketh away in an instant. In *Lost in Mongolia*, Colin Angus takes readers through never-before-seen territory and his wonderful sense of adventure and humour come through on every page.

A certain mixture of whimsy and derring-do is required to shove off down (or up) the New or Gauley River with scant protection aside from a helmet, life vest and one's compatriots. It's a choice that could be so easily avoided, but that wouldn't make sense to the proud and colorful characters who have long been shooting these rapids, some of the most popular and treacherous in the country. Here, Jay Young, a raft guide turned writer, leads readers through the local lore and history of the rivers, where--much to the delight of those brave enough to face these rapids--the ordinary almost never occurs.

Robbie's last-minute flight to the Midway Atoll proves to be a nightmare when the plane goes down in shark-infested waters. Fighting for her life, the co-pilot Max pulls her onto the raft, and that's when the real terror begins.

From their rise in the high Andes of Peru, the two sister rivers, Urubamba and Apurimac, join to form the Amazon, the world's largest and most powerful river, crossing an entire continent in search of the sea. This book traces Francois Odendaal's three expeditions to raft this extraordinary river. It is a story of adventure, courage and personal experience, as well as a geographical, environmental and historical celebration of the continent of South America.

Learning the Story of Scars After the axe-head buried itself in his ankle, my father clung to the log he was splitting, squeezing his eyes like fists. Twelve, he logged those woods for years with his father--Arkansas, the great depression, doing whatever they could. Groaning, he jerked and jerked the axe like a pump handle, he screamed and went on pumping until

the foot fell back, hinged by the ankle, white and spurting. With a bandana he held it and held it while Arkansas flooded, and saw his father running, his own axe raised ready to kill whatever snake slashed the heel of his son. I learned that scar like a tree split by lightning, healed over, knew my father had in him a boy who had suffered alone in a forest.

"McDonald's evocation of nature and farming is impressively simple, but suggests mystery and depth."--Publisher's Weekly "McDonald draws upon his personal vision of West Texas . . . offering a strong and sensitive image of the land, its people, its sense of space and struggle."--Books of the Southwest "We are privy to a consciousness that encompasses Texas from the Gulf to the Caprock, from oxen-slow days to jet lag . . . Rafting the Brazos makes us wish the poet could . . . do nothing but chronicle the spirals of West Texas hawks."--Dallas Morning News "West Texas, the land and its people, provide both the subject and the soul of McDonald's powerful poetry."--Writers at Work

Rafting with Grandmother is the adventure of a sixty-year-old grandmother and her two teen age granddaughters rafting for three hundred miles through the bottom of Grand Canyon. The nine days were filled with excitement as the altitude dropped two thousand feet. Each curve of the river brought new beauty and thrills. The history of the earth was spread out before their eyes. Lessons were learned and they will never to be forgotten. Imagination was sharpened and the quest for more knowledge about the ancient people the Indians talked about will always be with us. Who were these people that stored there grain in the caves so far above the raging river? How many years did it take for footprints to leave a path in stone? What did this place look like when the ancient people were alive? There were far more questions than answers. We now know this land has been built up by earthquakes and volcanoes and then eroded several times in the history of this earth. What a thrill for the hands to touch schist rock that was formed before there was a single living fossil on this planet.
