A solutions architect focuses on an organization's overall business goals, while an enterprise architect focuses on enforcing standards and managing items like data diagrams and process flows.

Solutions Architect vs. Enterprise Architect

Enterprise architects are best known for taking the "50,000-foot view" of a project. A solutions architect zones in on the details. Solution architecture concerns itself with the technical decisions involved in organizing and implementing the solution. It then compares them to business outcomes.

Enterprise vs. Solution vs ... - Architecture Center

As a solutions architect you tend to look at how to apply the right (or newest, or coolest) technology to a problem. But as an Enterprise Architect you often have to apply the right technology to your team.

Four Key Differences Between a Solution Architect and an ...

While the enterprise architect focuses on the enterprise-level design of the IT landscape, solution architects are in charge of finding and introducing solutions to specific business problems. They also manage all activities that lead to the successful implementation of a new application.

Enterprise Architect vs. Solution Architect vs. Technical ...

In a nutshell, enterprise architecture is portfolio-level thinking. It is strategic and cross-organisational planning of changes to business systems that are now or will be digitized to some degree. Whereas solution architecture is project-level thinking - about the design and planning of discrete systems/solutions.

The business planning context - Enterprise and Solution ...

Technical Architect works within a solution, Solutions Architect translates a problem to a solution, and finally Enterprise Architect defines which problem need a solution.

Solution architect vs Enterprise architect vs Technical ...

Solution architects ensure product consistency. They are responsible for the activities related to the requirements capture, concept design, implementation, maintenance. Enterprise architects deal with the enterprise-level design of the IT landscape in the context of the business capabilities of the organization.

Technical Architect vs Solution Architect vs Enterprise ...

There is something that I call "the orthodoxy" (or Good Old-Fashioned Enterprise Architecture-GOFEA; see GOFAI), which says that enterprise architecture is about high level strategic issues, whereas-say-solution architects are more about details and technology. Implicitly, this says "enterprise architecture is about high level and strategy only."
