The age-old debate between science and faith invites more players to the fore in this book. Proponents of the origin of life as a natural process and natural selection as a mechanism of evolution come face to face with advocates for the intervention of a creator, while other scholars believe that the gulf between science and religion should be bridged. At turns disconcerting, revelatory, and profound, readers are invited to leave their preconceived notions at the door

Perfect for fans of Deanna Raybourn's Veronica Speedwell mysteries comes the enchanting series debut from Vivian Conroy, *The Butterfly Conspiracy*. In late Victorian times, when new inventions cause both excitement and terror, a mysterious death at a zoological lecture brings together two unlikely allies in a quest through London's upper crust and underbelly to unravel the ingenious murder method and killer behind it. Miss Merula Merriweather is not like other women her age: instead of hunting for a husband at balls and soirees she spends her time in a

conservatory hatching exotic creatures. As the Royal Zoological Society won't accept a woman's accomplishments, she has her uncle Rupert take credit for her achievements. But at a zoological lecture, the guest of honor dies after contact with one of Merula's butterflies, and Merula's uncle is arrested for murder. In an attempt to safeguard evidence to prove his innocence, Merula almost gets killed but for the timely interference of enigmatic Lord Raven Royston. Viewing natural history as a last resort to regain respectability lost by too many dubious business investments, Raven didn't expect his first lecture to take a murderous turn. Feeling partially responsible because he encouraged Merula to release

the gigantic butterfly from the glass case in which it was kept, Raven suggests they solve the puzzle of Lady Sophia's sudden death together by looking closer at her relations with estranged friends, long suffering staff and the man groomed to be her heir, so close to her money and yet unable to touch any of it. With the police looking for them, and every new discovery raising more questions than answers, especially about the murder method which left no traces of foul play on the body, Merula will have to risk her own life to get at the truth and save her uncle from the gallows in *The Butterfly Conspiracy*, Vivian Conroy's enchanting series debut.

More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. American Cosmic examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in

aliens is due to a number of factors including their ubiquity in modern media like The X-Files, which can influence memory, and the believability lent to that media by the search for planets that might support life. American Cosmic explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.
