Parametric analysis of mixed flow conceptual turbofan engine was accomplished by the use of matlab program. A conceptual turbofan engine was utilized for the analysis phase. Thrust specific fuel consumption (SFC), specific thrust (ST), and overall efficiency (no) objective functions, which are the parameters indicating engine

Turbofan engines come in a variety of engine configurations. For a given engine cycle (i.e., same airflow, bypass ratio, fan pressure ratio, overall pressure ratio and HP turbine rotor inlet temperature), the choice of turbofan configuration has little impact upon the design point performance (e.g., net thrust, SFC), as long as overall component
