Biocentrism takes the reader on a seemingly improbable but ultimately inescapable journey through a foreign universe—our own—from the viewpoints of an acclaimed biologist and a leading astronomer. Switching perspective from physics to biology unlocks the cages in which Western science has unwittingly managed to confine itself.

The new theory is called Biocentrism, created by the worlds third most important scientist: Robert Lanza. Apparently in Biocentrism life consciousness are keys to understanding true nature of the universe. This time our biology has been taken into the quantum physics equation. Yet, the power of science doesn't come from fact, but from doubt.

~~BIOCENTRISM~~

Biocentrism, also referred to as the biocentric universe, is a theory proposed by renowned scientist, Robert Lanza. This theory explains that life and biology are the central pieces to being, reality and the cosmos. It explains how life creates the universe rather than the other way around. Biocentrism builds upon the ideas of quantum physics.

The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics. It seems fitting, then, to begin the century by turning the universe outside-in and unifying the foundations of science with a simple idea discovered by one of the leading life-scientists of our age.
