In child therapy, we need to learn to be creative and to work in a way that children can understand and engage with. Colouring books, paints, pencils, felt-tip pens, paper and modelling materials are found in the toolbox of most child and adolescent therapists, and can all help hold young people's attention.

Working with Children and Young People • Counselling Tutor

References made to 'child' and 'children' refer to children and young people under the age of 18 years. However, the principles of the document apply to professional behaviours towards all pupils, including those over the age of 18 years. 'Child' should therefore be read to mean any pupil at the education establishment.

Written from a unique interprofessional perspective, this book is an essential introduction to working with children, young people and families. It covers policy, practice and theory, exploring key themes and developments, including: - poverty and disadvantage - ethical practice - child development - education - child protection - children and young people's rights - doing research. The book introduces students to a range of theoretical perspectives, links the key themes to the existing and emerging policy and practice context and supports students in engaging with and evaluating the central debates. With case studies, reflective questions and sources of further reading, this is an ideal text for students taking courses in childhood studies, working with children, young people and families, interprofessional children's services, early years, youth work and social work.

Working with Children and Youth with Complex Needs provides a detailed description of techniques and rich stories of how social workers, psychologists, counselors, and child and youth care workers can help young people become more resilient. With ample case studies and fascinating explanations of research, Dr. Ungar shows why we need to work just as hard changing the environments that surround children as we do changing children themselves. Building on lessons learned from clinical, community and residential settings, Dr. Ungar discusses 20 skills that can enhance the effectiveness of frontline mental health services. Along with descriptions of the skills necessary to talk with clients about the factors that put their mental health at risk, Working with Children and Youth with Complex Needs also presents systemic practices clinicians can use in their everyday work. Engaging with children's extended family, addressing issues of community violence, racism and homophobia, and helping parents and teachers understand children's maladaptive coping strategies as sometimes necessary are among the many practical strategies that are discussed which clinicians can use to enhance and sustain the therapeutic value of their work.

Rev. ed. of: Communicating with children and infants. 2nd ed. 1997.

The Handbook For Working With Children & Youth: Pathways To Resilience Across Cultures and Contexts examines lives lived well despite adversity. Calling upon some of the most progressive thinkers in the field, it presents a groundbreaking collection of original writing on the theories, methods of study, and interventions to promote resilience. Unlike other works that have left largely unquestioned their own culture-bound interpretations of the ways children and youth survive and thrive, this volume explores the multiple paths children follow to health and well-being in diverse national and international settings. It demonstrates the connection between social and political health resources and addresses the more immediate concerns of how those who care for children create the physical, emotional, and spiritual environments in which resilience is nurtured.

This interdisciplinary core textbook looks at learning and development from birth to 19 years, and provides an accessible introduction to the common areas of study across the many roles supporting learning and development. There is coverage of common themes and issues, and theory is closely integrated with practice throughout. Chapters cover: physical development, cognitive development, social and emotional development, professionalism, leadership, quality and effectiveness, working with families, safeguarding and promoting well-being, transitions, and equality and inclusion. Reflection points, workplace activities and professional development planners are all included, and these challenge readers and students to critically engage with theory in their own practice.

This book is essential reading for anyone studying and working in the new integrated children's services. The Children's Workforce Development Strategy sets out the basic skills and knowledge needed by people whose work brings them into regular contact with children, young people and their families. Built around this Common Core of Skills and Knowledge and packed with case studies and reflective exercises, this book helps students and practitioners understand the theory behind these issues and develop strategies for embedding them within their own practice.

Bridging the gap between learning and the application of knowledge and skills in Early Years settings, this book addresses the nuanced complexities and challenges which students may face as they progress into professional practice. Built around the experiences of undergraduate students, solution-focussed chapters tackle contemporary issues such as safeguarding, new materialism, reflective practice, and working with refugee children, linking these to theoretical and philosophical models and drawing on undergraduate and practitioner insights. Providing contextualised examples, insight into key issues, and application of theory to practice, this book offers incisive solutions to support the undergraduate journey into a career, with chapters covering topics such as: Best practice as a practitioner creating a caring environment Reflecting on practice to cultivate professional development Working with and for marginalised children Reflective practice Working with Children, Families and Young People is perfect for undergraduate students on Early Years and Childhood Studies courses, as well as other courses pertaining to working with children and young families, social work, and young communities.

"Introduces your students to the fast-growing field of early childhood education. Your students will develop skills for guiding children effectively while keeping them healthy and safe. Working with Young Children applies child development principles to child care settings"--Publisher.

For those working with children, effective communication is a crucial part of building relationships and encouraging children's emotional and intellectual development. This practical guide identifies the child and their relationship with the adult as the basis upon which real communication can be made. Topics covered include non-verbal communication, attentive listening, empathy, the part played by questions, working constructively with conflict and criticism, and communicating in groups. It also draws on the innovative ideas found in social pedagogic theory and practice, such as communicating with your head, hands and heart and how to differentiate between the personal, the professional and the private in your interactions. The book contains exercises, topics for personal reflection or group discussion, and suggestions for observations. This will be an excellent source of advice and ideas for all those in the children's workforce including early years professionals, teachers, social workers, counsellors and practitioners working with children in care, including foster carers.

With case studies, interactive activities, summaries and guidance throughout, this book looks at the changing context of children and young people's services heralded by the structural, organizational and funding changes put forward in Eileen Munro's Review of Child Protection. It is strongly grounded in research and theory, and gives specific consideration to how systems theory can help practitioners in understanding families. It highlights the need for every social work practitioner to develop the capacity to undertake unified assessments and interventions in a wide variety of settings with individuals, families, and groups where there are child protection and safeguarding concerns.
